Prefatory Note

The accompanying bibliography has been assembled for the use of students and research workers on population, agriculture and the other economic fields that at various times have come within the orbit of the Census. Designed originally for internal use in the Dominion Bureau of Statistics, it enumerates every tabulation, known to the Bureau published and unpublished, that has been made at any time of the Census materials. The unpublished tabulations may be consulted at the Bureau of Statistics.

The Censuses thus covered include not only the regular decennial censuses of Canada taken since Confederation, but the similar censuses of the original members of the Confederation back to 1851, and the various earlier censuses of the Colonial period, British and French, in the areas now constituting the Dominion.

It is proposed to issue later on a revised edition that will include the tabulations of the Census of 1931, as well as the results of further research into the records of early Censuses that may be in existence at the Public Archives.

The Bibliography has been compiled by Mr. M. C. Maclean, M.A., Chief of Census Analysis, Dominion Bureau of Statistics.

R. H. Coats,  
Dominion Statistician.

# Census and Pre-Censal Records of Canada:

## Analytical Bibliography

---

### Introduction.

The bibliography of Census and precensal records of Canada covers both the published and unpublished Census material found in the Library and Census files of the Dominion Bureau of Statistics.

The Census records are arranged for the purpose of this bibliography under thirty-eight different headings, each representing a main subject under which lists of the Census tabulations are arranged as sub-headings, roughly in the order of their comprehensiveness. The information contained in the tables under each heading and sub-heading is analyzed into five types, a column being devoted to each type, as follows: (1) the ages (where applicable) of the person for which the information is given; (2) the areas represented in the information; (3) the information with which each subject is cross classified; (If it happens that the table contains, in addition to the subject indexed under the heading and sub-heading, a secondary subject of importance, this parallel information is mentioned in this column); (4) the Census year for which the information under each heading and sub-heading is given; (5) the source of the information; i.e. where the information is to be found.

The abbreviations used in the column headed "Source" may be explained by illustration as follows:

'21 - II - 58 means Census of 1921, Volume II, page 58.

'11 - B XVIII - 8 means Census of 1911, published Bulletin XVIII, page 8.

'11 - F CXL means Census of 1911, Folio (unpublished material) CXL.

The folios referring to each Census are arranged and numbered consecutively in the Census stacks of the Bureau.

It is intended later to add to this bibliography a part showing a list of the information given by the Census of 1931. This 1931 information is given separately because the tabulation is not completed at date of issue of this bibliography.
